

# INSTALLING NODE.JS ON WINDOWS

eee

eee

# METHOD 1 - INSTALLING NODE.JS

Step 1 : Download Node.js installer from

<https://nodejs.org/>

Step 2 : Run the installer, follow the installation wizard, and accept the defaults.

Node.js and npm will be installed.

# USING NODE VERSION MANAGER (NVM)

Step 1 :Download Node.js installer from:

<https://github.com/coreybutler/nvm-windows/releases/download/1.1.11/nvm-setup.exe>

Step 2 : Run the installer, follow the installation wizard, and accept the defaults.

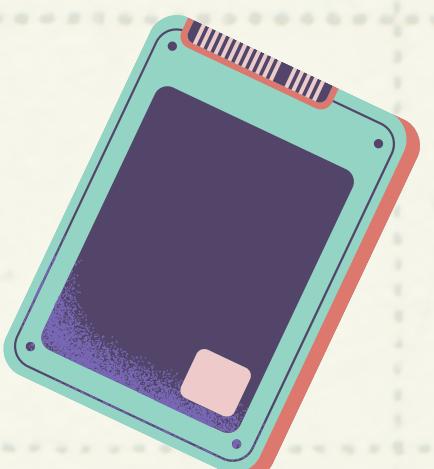

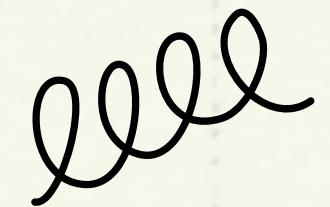

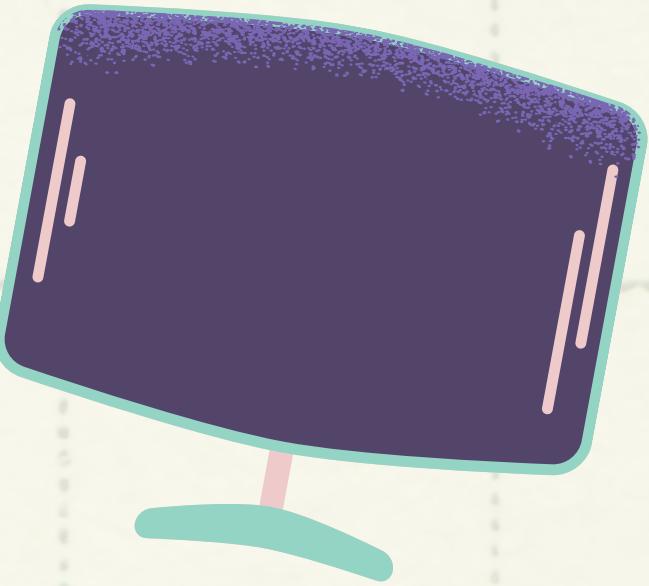

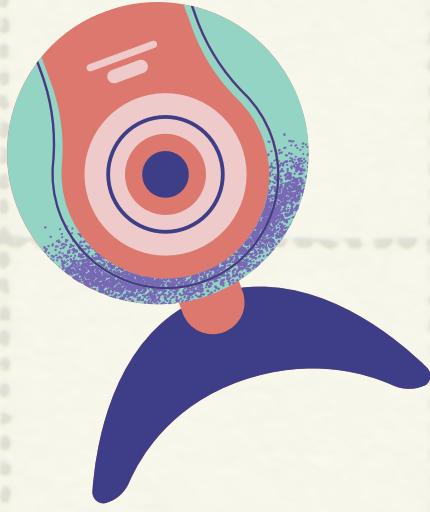

Node.js and npm will be installed.

# IMPORTANT NVM COMMANDS

1. Go to “Command Prompt”
2. Type “nvm list available” - it will list all available node versions
3. nvm install <18>- installs the particular version
4. nvm use <18> - easliy switches between node version
